CONSTRUCTION BULLETIN 13TH FEBRUARY 2024

Thrive Living
by Retirement Villages

Indicative CGI

Dear Neighbours,

We will soon begin the piling works stage of the enabling works, commencing on Monday 19th February, constructing piles that will be around 12m deep. The process is expected to take around four weeks and will use the CFA method which produces the least amount of vibration & noise of the piling methods. The construction method and the pile arrangement has been designed with consideration to the ground conditions and the below ground existing railway tunnels.

There will be several deliveries this week from Wednesday 14th to bring the components of the piling rig to the site. The rig will then be assembled and ready to begin install of the first piles from Monday 19th.

McAlee & Rushe site management and traffic marshals will oversee the safe delivery of the piling rig with the aim to avoid disruption and congestion as reasonably practicable.

If you have any questions regarding these works, please do not hesitate to contact us via the below.

It is our intention to keep you informed of site activities and progress via our newsletters. It is important through the duration of the project that neighbours are made aware of updates that could affect them. If you would like to receive these electronically, please register via <https://tunbridge-wells.retirementvillages.co.uk/contact-us/> or scanning the QR code on the right.
